DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-7 and 12-18 are rejected under 35 U.S.C. 102(b) as being fully anticipated by Schulse.

See the text on page 3, lines 34-116 that clearly states the inventive concept.

Claims 1-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Boyer et al. It is inherent that the liquid is held in tank 26 by a combination of vacuum pressure acting on the liquid in the tank 26 through vent tube 25, and the atmospheric pressure acting on the liquid in the reservoir 10. This would reduce noise during dispensing. Elements 13-24 are readable on the first and second valves as claimed.
